**HIGH PERFORMANCE LUBRICATION SYSTEM**

- single or multiple points
- easy to use and reusable
- remote installation
- patented control system
- for all types of industries
- guaranteed return on investment
High-quality lubrication solutions
MEMOLUB® offers a range of class leading single & multi-point lubrication systems, recognised as the benchmark and undisputed reference point for electro-mechanical lubricators. The exceptional features and high quality manufacture of MEMOLUB® offers outstanding protection for lubricated equipment across a wide range of industrial applications.

EFFECTIVE, EASY TO USE, AND ACCURATE

The right Lubricant, the right Quantity, at the right Time and on the right Place.

ECONOMICAL
- Long-term protection of equipment.
- Increased reliability.
- Cartridge change in less than 60 seconds!
- Accurate lubrication.
- Reduced maintenance costs.
- Increased profitability.

RELIABLE
- Industry proven: 25 years’ worldwide distribution.
- Exceptional control features.
- Patented pump design.

SAFE
- Remote installation for difficult or dangerous access points.
- Reduced downtime for lubrication.
- Easy to use.
- Instant verification offered by transparent housing and check function.

ECOLOGICAL
- Reusable.
- Wide range of low cost replacement cartridges and battery power packs.
- Unlimited refills.
- Reduced environmental impact.
- Reduced lubricant consumption and improved protection of production equipment.

Examples of applications

BEARINGS  CHAINS  LINEAR GUIDANCE  GEARS  BALL SCREW
Dosing pump
The Memo

A powerful and efficient pump
- Dosing pump with adjustable output.
- Lubricant ejection pressure from 10 to 25 bar.
- High-performance pump able to pump lubricants at extreme temperatures and with high viscosity.

The Memo: Smart Setting
- The patented Memo system adjusts the lubricant discharge frequency.
- The discharge frequency is set for each lubrication point once for all, but it can be adapted on demand at any time.

The technology: the accumulator effect
MEMOLUB® not only protects the moving parts of your machine, it protects your lubricant.

Excessive pressure applied to the lubricating grease causes oil separation. Back pressure generated by a lubrication system depends on a number of factors. The tubing diameter, the type of lubricant and the ambient temperature, are all major contributors but the most significant element is the speed/pressure at which the lubricant is expelled.

MEMOLUB®’s unique method of operation eliminates this problem. Thanks to its patented design Memolub allows the lubricant to travel to the lubricating point without the need for excessive pressure.

The lubricant remains in its premium condition offering substantially improved lubrication of your valuable asset.
Memolub® 10 bar
Single-point, reusable and remote lubrication system

EM
120 cc model. Specifically for controlled micro-lubrication. Specially suited for applications requiring frequently little quantity but frequent greasing: small bearings, linear guidance, chains, electric motors, etc.

ECO
240 cc model. Lubricants for larger components that requires more.

ONE
240 cc model. Ideally suited for difficult environments where the lubricant must also play a protective role. Can be used for all types of application.

All our 10 bar models are battery operated.

Memolub® 25 bar

Single or multiple points, reusable and remote lubrication system

**HPS**
Universal model with battery power supply, allowing it to be used in all types of environments and applications. This model provides regular, accurate and reliable lubrication.

**EPS**
Ideal for lubrication on installations functionary on a irregular basis. The frequencies of the MEMO are stored.

**PLCd**
Unlimited settings with possible machinery feedback. The perfect solution for OEMs.

* Only with MEMOLUB® EPS
Typical applications

- Critical components
- Difficult or dangerous access points
- Accurate greasing
- High greasing frequency
- Lubrication without machine downtime

MEMOLUB® systems have an excellent reputation and are distributed in more than sixty countries around the world.

**Typical applications**

- **Food industry:** lubrication of press ball bearings.
- **Automotive industry:** lubrication of aerial conveyor belt rollers and rails.
- **Mineral industry:** lime factory: lubrication of 4 screw drive bearings.
- **Textile industry:** Picanol weaving loom bearings.
- **Mineral industry:** lubrication of conveyor belt bearings.
- **Robotics industry:** lubrication of ball guides.
- **Food waste processing industry:** cabinet of Memolubs for the lubrication of bearings and casing of a rotation fermenter.
- **Metal industry:** lubrication of return roller bearings on a production machine for aluminium sheets.
- **Food industry:** lubrication of Solyvent Ventec ventilator bearings.
Accessories

**SPLITTER MEMO HPS**

HPS Kit for 2 points

**DISTRIBUTOR KIT HPS**

HPS Kit for 3 to 8 points

**EXTENSION KIT**

Single point fixture kit

**BRUSHES AND KIT**

Brushes to lubricate chains

**CRANE RAIL**

Rail lubrication

**SPRAY NOZZLE**

Liquid grease sprays

**LUBRICATION PINIONS**

Lubrication pinions

**PROXIMITY SWITCH**

Lubrication switch

**PROTECTION COVER**

In difficult environments, water, salt

**MEMO KIT**

Frequency adjustment kit

**SPARE PARTS**
